

Hi, I'm Fady Khella 🖐️

Head of Pre-Sales Engineering — North & Latin Americas @ AMD CCIE #23719 (Enterprise Infrastructure, since 2009) · MBA · AMD Brand Ambassador · ex-Cisco, Intel, Extreme Networks, Celestica

I lead AMD's Americas field engineering organization — a ~\$3.4B Enterprise, Channel, Sovereign AI, and Confidential AI pre-sales business spanning EPYC, Instinct (MI350/355X/455X/410P), Pensando, and Helios, across HPE, Dell, and Celestica configurations. My team designs end-to-end AI, cloud, networking, cybersecurity, and high-performance data center architectures with hyperscalers and AI-native compute customers, and drives enablement of AMD's ROCm software stack — including CUDA-to-ROCM migration — for enterprise AI deployment.

23 years driving AI, compute, and networking strategy for hyperscalers, CSPs, and global enterprises — across the Americas, EMEA, and APAC — with prior leadership roles at **Celestica** (Field CTO / Director, Sales Systems Engineering — Connectivity & Cloud), **Extreme Networks** (Director of Product Management, SP Data Center & Cloud), **Intel** (WW Service Provider Sales Solutions Architecture Leader), and **Cisco Systems** (Global Services Provider Product Management, and multiple systems-engineering leadership roles across EMEA and APAC/ANZ).

This GitHub is where I turn that architecture work into hands-on builds: reference stacks, deployment scripts, and lab configs for the AI infrastructure I design in my day job.

🧠 What I work on

- **AI infrastructure** — GPU/XPU accelerator platforms (AMD Instinct, custom AI ASICs), local & hyperscale LLM inference
- **ROCm / AI software enablement** — CUDA-to-ROCM migration, AI Workbench, AMD Inference Microservices (AIMs)
- **Cloud-native & multi-cluster data center architectures**
- **Networking & cybersecurity** — enterprise and hyperscale design (Nexus, ACI, SRv6, ZTNA, XDR)
- **High-performance computing (HPC)**

📌 Featured project

[amd-radeon-epyc-ollama-webui-stack](#) - A reference deployment for running local LLM inference on AMD Radeon + EPYC hardware using **Ollama** and **Open WebUI** — service

configs, model tracking, and containerized setup for standing up a self-hosted AI stack on AMD silicon.

Career

Company	Role	Period
AMD	Head of Pre-Sales Engineering — N&L Americas	2026 – Present
Celestica	Director, Sales Systems Engineering (Connectivity & Cloud) / Field CTO	2025 – 2026
Extreme Networks	Director of Product Management, SP Data Center & Cloud	2023 – 2025
Intel	WW Service Provider Sales Solutions Architecture Leader	2021 – 2023
Cisco Systems	Global Services Provider Product Management Manager, Data Center	2019 – 2021
Cisco Systems	Enterprise Regional Sales Manager — Energy/Oil & Gas	2017 – 2019
NCR Corporation	Country Cisco Systems Engineering Manager	2015 – 2017
Logicalis Australia	Regional Enterprise Cisco Solutions Architect Leader	2014 – 2015
Ingram Micro Australia	Senior Country Cisco Solutions Architect Leader	2013 – 2014
Accenture Australia	Senior Solutions Engineering / Consulting Sales Leader	2010 – 2012
Orange Business Services	Senior Cisco Solutions Architect Team Leader	2004 – 2010

Certifications & education

- **Cisco:** CCIE #23719 — Enterprise Infrastructure (since 2009), CCNP, CCIP, CCDP, CCDE (written), CCIE SP (written), CCIE Voice (written), Cisco Sales Expert, CMNA
- **Cloud/AI:** AWS Certified Solutions Architect – Associate & Professional, AWS Certified Machine Learning – Specialty, Intel Certified Pro (AI in the Cloud, Gaudi AI Accelerator, Cloud Security), Databricks & Gen AI Fundamentals
- **VMware:** VCP-NV, VTSP-SV, VSP-IV
- MBA, International Business — University of Newcastle
- B.Sc., Electronics & Telecom Engineering — Cairo University
- Professional Engineer (Electrical/Electronics/Comms) — Engineers Australia
- PMP & ITIL Foundation v3

Awards

- Cisco Global Perfect Pitch — First Rank, Data Center/ACI (2015) & Enterprise Networking/IoT (2014), APJC/ANZ
- Cisco Systems International FY18 Sales Achiever
- Cisco Global IMPACT Win Award
